

## International Healthcare Data Scientist

**Economist Intelligence Clearstate** offers healthcare-focused market and business intelligence and strategic advisory to support companies in the healthcare sector to understand their current and potential markets, and implement pragmatic and innovative strategies to ultimately tap into new growth opportunities.

In order to further augment our dynamic team we seek a data scientist for the following primary responsibilities:

1. **Technical Project Execution:** You will be part of several project teams in Leipzig, London, Singapore, Shanghai, aiding/guiding them in tasks related to technical infrastructure. That includes CATI/CAWI programming (mainly in LimeSurvey), methodological counsel, setting up processes (R scripts) for data export, processing and storage, implementing automated quality control and creating a variety of excel-based tools for content teams and project management.
2. **Data Analysis:** You will also support or lead script-based analysis of projects, conducting statistical analyses / modelling and implementing different kinds of deliverables in collaboration with the content team. These include Excel and PowerPoint-based results and web-based solutions like RShiny or Tableau apps. Most projects will be healthcare-related.

### Candidate's profile

The candidate should ideally possess the following skills/relevant experiences:

- Good command of the R language (ideally with background in plyr, tidyr, ggplot, shiny), or extensive experience in data analysis using any other language (e.g. Python) and willingness to learn R
- High proficiency in using PowerPoint and Excel (formulas, pivoting)
- Willingness to build up and extend knowledge in different side skills like: Web languages (HTML, JavaScript, CSS, PHP), VBA, SQL
- Ability to manage tasks with a high degree of organization, conscientiousness, self-sufficiency and proactivity
- Highly analytical thinker, enjoy intellectual challenges
- Exceptional command of written and spoken English

### You will be able to demonstrate:

- Excellent people skills, with the ability to motivate teams and work well with people across all levels in the organization
- High business acumen with versatility to think inside and outside of the box
- Ability to work independently and among teams, in a fast paced team structure
- Superior communication skills
- Highly self-aware, flexible and focused on solutions
- Highly analytical, organized and meticulous
- Versatile and able to think inside and outside of the box
- Able to work in a fast pace team structure

The role would start asap.

### We are looking forward to receive your application, please send CV and cover letter to:
